

### **A1: Demystifying the Resource Patient Management System (RPMS)**

**Speaker:** Christopher Lamer, PharmD, BCPS, NCPS, CDE

This program will provide an overview of the Resource Patient Management System (RPMS) computer system and related applications. It is not a training course; it will describe the way RPMS is designed and updated to meet the needs of clinicians and the population they serve.

1. Understand what RPMS is and how it works.
2. Be familiar with various applications that work with RPMS.
3. Know how the Office of Information Technology (OIT) collects feedback and requirement for new software or software updates.
